## SUMMARY

ECE undergraduate with practical experience building a Python-based AI resume evaluation project. Familiar with LLM integration, prompt design, Pydantic data validation, structured JSON output, object-oriented programming, and basic data structures and algorithms. Looking for an entry-level AI/Python engineering or internship opportunity to apply these skills in a real development environment.

## TECHNICAL SKILLS

|               |                                                                                        |
|---------------|----------------------------------------------------------------------------------------|
| Languages     | Python                                                                                 |
| AI / LLM      | LLM Integration, System Prompt Engineering                                             |
| Programming   | Object-Oriented Programming (OOP), Basic Data Structures & Algorithms, Problem Solving |
| Data Handling | Pydantic, Structured JSON Output, Data Validation                                      |

## PROJECT

AI-Powered Resume Evaluator and Candidate Matcher

Python | LLM | Pydantic

- Built an automated resume screening tool that compares candidate resumes with job descriptions and extracts relevant qualifications.
- Used Pydantic schemas to validate model responses and keep the generated output in a consistent JSON structure.
- Worked with system prompts, temperature, and token settings to make evaluation results more consistent and repeatable.
